Chairmen of Political Organizations Give Estimates on Result of Election.

Managers of all political parties were at their bendquarters until late last

workers of all parties will be busy get-ting out the vote.

The chairmen of each political party on the eve of the campaign expresses confidence in the outcome. The Pro-gressives do not claim the state, but ty, Weber county and ax or seven smaller counties throughout the state, smaller counties throughout the state. They predict that they will have half the membership in the state legislature, the other half going mostly to the Democrats, with the Republicans the Democrats, with the Republicans and Democrats retaining only a few seats. Secretary Heber L. Cummings of the Republican state committee was confident that the pluralities would be even greater than those given by Chairman Garduer. He said that the Republicans would carry every county in the state with the possible exception of Washington and Besver.

### Folland's Estimate.

Chairman W. H. Folland of the coun ty committee, said:
"We will carry Salt Lake county
for the Republican national, state and
county tickets by from 7000 to 8000
votes. We have a splendid organization and we are prepared to get our vote out in five share. I can conceive of nothing that will prevent us from securing a plurality of at least 7000 for the entire ticket."

### Thurman's Statement.

Samuel E. Thurman issued the following:

We have reports at the Democratic state besequarters from every county and precinct in the state that indicate a decided Democratic plurality. There is, however, a large percentage of doubtful voters who decline or refuse to tell the canvassers how they are going to vote. They usually say they have not made up their minds. This doubtful vote holds the balance of power. I assume it is largely democratic, or, rather, consists on Republicans who intend to vote the Democratic theket but do not care to have it known. This opinion is based on it known. This opinion is based on the fact that it is a common thing every day for Republicans to inform us that they intend to vote the Democratic tleket but do not care to have this fact published. These statements tre sometimes accompanied with substantial contributions to the Dem

she value. Supplementing Mr. Thurman's statement. Samuel Russell, vice chairman of the Democratic state committee, said:

Wilson will come to Salt Lake county with a plurality over Taft. In this county the defections from the rogular Republicans to the Buil Moose party and the Democrats will go far toward equalizing the regular Democratic and Republican vote in the county. The final result depends on how the American party vote is splif. If Wilson gets more Americans than Tast, the Wilson electors will receive a plurality in the state.

## Says Wilson Will Win.

Says Wilson Will Win.

The people of Sait Lake county constitute one of the most progressive communities in the United States, and the progressive sentiment is concentrating on Wilson. Taft's cause is hopeless—a vote for him is cast away. A vote for Roosevelt in Itah is futile for any purpose exceptibul of protest. But protest and negation will not redeem Usah from the reputation for reaction against progress. Something affirmative must be accomplished. Utah should participate in the inevitable election of Woodrow Wilson. There is no one thing which would so elevate the people of Utah in the estimation of our fellow. Americans throughout the country as the choosing of Wilson fellow Americans throughout the country as the choosing of Wilson to the emiliphened and unconstrolled vote of Sait Lake county to put Utah into the column of order and rational progress, and the people of Sait Lake county as prediction.

## Thomas's Prediction.

T. F. Thomas, chairman of the Democratic county committee, said:
Sait Lake county will go Democratic by a plurality of at least 1968
votes. We have had a careful cancars and a recunvass of the vote of
the entire county. Our estimate is
arrived at only after the most careful and conservative poll of the sitmailen. Our organization is as bear
perfect as it is possible to make it,
and every one in the organization is
working hard for the spiendid victory
in this county that is now inevitable.

counte the Republicans and Democrats will just about break even, according to present indications. Governor Spry will probably come into Salt Lake with every Progressive candidate in this county by a planality of 5000.

Senator Henry Gardner, state chair turn of the Republican party, appeared confident that the usual Republican planality in the state would be reduced only slightly. He said that Governor Spread the Republican state ticket would come into Salt Lake with 5000 parently and the Republican state ticket likely come into Salt Lake with a plushed would come into Salt Lake with a plushed that the ticket would be readed.

### This County Doubtful.

speaking frankly admit that they are unable to arrive at any prediction relative to this county that will satisfy themselves. Most agree that the county will be close, though one or two predict a landslide. From surface indications it would appear that the Republicans would have a slight lead in the county, the Democrats would be second and the Progressives third.

county, the Democrats would be second and the Progressives third.

It is now conceded that the Progressives will poll a large vote in the county. The consensus of opinion is that the Progressive vote will be 19,000 and possibly more. The Progressives will have a large rescentage of the American vote and from 10 to 20 per cent of the Republican vote.

per cent of the Republican vote.

'The Democrats are sanguine in the county and are predicting a Democratic victory in the county by from 2500 to 3000 plurality. Democrats say they victory in the county by from 2500 to 3600 phirality. Democrats say they will hold the Bryan vote of four years ago and in addition will secure many Republican votes. Bryan four years ago secured a vote of 12,054 in the county, which, with three parties in the field, would be almost enough to carry the county this fail. However, it is certain that some of those who voted for Bryan in this county four years ago will this year vote for either Roosevelt or Taft. On the other hand there appears to be considerable justification for the Democratic belief that many hundreds of Mormon voters who voted the Republican ticket four years ago to defent the American party will ngo to defent the American party will this year return to the fold.

The Republican strength in this country will be augmented by the addition of many American voters who were farmer Republicans and who will be Republicans again this year. Republican leaders assert that this addition will make up for defections to the Democratic and Progressive parties. It is hardly likely that this gain will offset the loss. However, it would require a net loss of about 3000 votes on the part of the Republicans to give either the Progressives or Democrats more than an even chance to carry the county. There is an apathy with the many American voters who were county. There is an apathy with the Republicans that a hard-working or ganization has not overcome and some Republicans are expressing the fear that this apathy will result in a de-feat for the Republicans in the county.

## Progressives Will Lose.

Throughout the state the strength of the Republicans has been broken of the Republicans has been broken into both by the Progressives and the Democrats. The Progressives have no chance to carry the state, but they have been making common cause with the Democratis and would regard a Democratic victory in the state as a triumph for the Progressives. In many of the counties the organizations have been working with considerable harmony, each organization fighting the Republicans, but leaving each other

The Republicans in the first part of the week appeared to be making gains and the Progressives were apparently standing still, but toward the end of the week a tremendous drift toward the Progressives set in and in some counties the Progressive vote will exastic Progressive managers. Marked Progressive managers. Marked Progressive gains have been apparent in Beaver, Box Elder, Cache, Carbon, Sevier, Sanpete and Weber counties. The result in each of the counties has necessarily been direct benefit to the Democrats and indications are that the Democrats will carry each of the Democrats will carry each of these

Progressives are claiming several counties in the state, including Salt Lake county. It is hardly likely that they will be able to do better in any of the counties claimed than to divide the regular Republican vote and allow the Democrats to win.

To the Voters of the State of Utah—We desire to call your special attention to the proposal to amend section 1 of article 11 of the state constitution, relating to counties, cities and towns, and providing for the creating of new counties, and to ask your favorishie action. Following are the eight proposed amendments to the state constitution of Wasatch county and the western to be voted on tomorrow. They are set out and explained in such manner that they will be easily understood and voters will then be in a position to act intelligently upon the propositions: QUESTION 1-Members of the state

egislature now receive \$4 per day and 10 cents mileage each way. This is the limit allowed by the constitution, The amendment provides that they

alleage each way until otherwise pro-ided by law. QUESTION 2-The constitution no provides that any city or town may in-ur indebtedness not exceeding 4 per ent of the assessed value of its

able property, for the purpose of sup-plying water, artificial lights or sewers, when the works therefor are owned and controlled by the municipality. The amendment authorizes cities of the second class (having less than 20,000 inhabitants) and cities of the third class, and fowns, to incur indebtedness not exceeding 8 per cent of its assessed valuation for said purposes. The change

valuation for said purposes. The change is from 1 to 8 per cent and the amendment does not affect Salt Lake City.

The indebtedness for said purposes under the present constitution and under the amendment can be incurred only by a majority vote of qualified electors, who must be taxpayers, voting at an election on the question of incurring such debt. ing such debt.

QUESTION 3-The amendment pro vides for the formation of new counties from territory of existing counties, when a majority of the qualified electors voting in the territory to be cut off, and also in the territory remaining, shall vote separately for the formation of such new county QUESTION 4-The constitution

provides that the state treasurer shall be the custodian of public moneys.

The amendment provides that the public moneys shall be deposited by the treasurer under the supervision of the board of examiners. The board under present law is composed of the gover-nor, secretary of state and attorney

It should be noted that this amendment will probably relieve the state treasurer under his bond from liability for loss of state funds so deposited.

QUESTION 5-The constitution now prohibits the legislature from exempting any property from taxation. It also provides that property shall be taxed in proportion to its value. The legislature must also provide an annual tax, sufficient to pay the state debt, if any, within twenty years from the passage of any law creating the debt.

The amendment authorizes the legis-lature to provide for exemptions from

value of the property.

The amendment provides that the as-

If a majority of the electors who

vote on any amendment votes "ves" thereon, such amendment becomes a part of the constitution.

Any voter oprosed to any amend-ment should vote "no" thereon, other-wise a small minority of the electors of the state may secure the amend-ment of the constitution, that is dis-approved by the majority.
